

NEFEMED

The Dutch Federation of manufacturers, importers and distributors of medical products

Created in **1978**

Mission

For Nefemed the availability of and access to medical devices by patients is key.

At least 3 items can be derived from this mission:

- Within innovation we concentrate on new products and the financing system and on labour savings technologies where medical technology is really a part of the solution;
- Within the issue of reimbursement our goal is to have a legal framework where the characteristics of medical devices are taken into account, that is different from the farma-sector;
- The third item are overall conditions which enable companies to act on a fair market where added value is appreciated.

Membership

60 members

Secretariat

3 part-time staff members

Secretary General:
Roelf van Run

MedTech industry in figures

- Turnover: approx. € 2.5 - 3 billion
- Employment: not available

Chairman:
Dirk PEKELHARING
